

A UNIVERSE OF STORIES!

Three-Time Emmy award storyteller and author Bobby Norfolk has performed as an actor, comedian, and teaching artist throughout the United States and world-wide for over 40 years. Well known for his high-energy performances, lively animation and unique sound effects, he also has 8 published storytelling CD's and has written several books for adults and children. In May 2018, the faculty at the University of Missouri, St. Louis voted to honor Bobby with the Degree of Doctor of Humane Letters where he gave the commencement address to The College of Arts & Sciences.

Fun For The Whole Family!

Look up! The sky, the stars, the planets, the sun, and the moon have long inspired stories and legends, enabling our imaginations to take us into the vast unknown. This performance takes the audience member through story into mysterious space, exploring stars, constellations, black holes and so much more!

Bobby Norfolk skillfully engages his audience and presents stories in an interactive, high energy, and lively performance, drawing on personal experience, fairy tales, folktales, myths, and legends from around the world. These stories of “how things came to be” will enchant the young and young at heart! This program will explore the physical sciences and astronomy.

Stories/topics may include:

- Why the world is not flat
- Amazing findings of Galileo and Copernicus
- Grandma Spider Brings The Light - Story
- Revisiting the total eclipse of 2018
- Stella and the Star Thief - Story
- Fun With Amazing Science Facts!
